

Retard Finder Coin Whitepaper (RFC)

Introduction

Retard Finder Coin (RFC) is a meme coin built on the Solana blockchain, launched directly on a Solana network DEX to ensure transparency and security. Inspired by the "I Find Retards" community on X (Twitter), RFC embodies the power of free speech, humor, and decentralized finance. Unlike many meme coins, RFC is built with a fixed supply, zero taxes, and no airdrops, ensuring fairness and sustainability.

Mission Statement

RFC aims to be the go-to meme coin for those who appreciate humor while maintaining legitimacy and trustworthiness in the crypto space. We reject rug pulls and scams, offering a truly fair and community-driven token.

Why Solana?

Solana was chosen for its low fees, high speed, and strong ecosystem. This ensures that RFC transactions are fast and cost-effective, making it accessible for everyone.
